

- Work with Mukund
 - Create a sample dataset
 - Teach people how to run sample analysis
 - Create a blog on the RISR website and recording some videos on the basics of R
 - Could also put the sample dataset on the website as well
 - Start with data cleaning etc
 - Show them how to clean a big, messy dataset
 - Get some activities on the website first, before we move on to the in person workshops
 - How to use AI tools to format your code and research?
- Film a video after 3 articles?
 - Get 3 good blog articles first
 - Then film a few videos
 - After this, organize the in person workshops

Action item:

- Come up with 2 or 3 article items, send to the team for approval
-
